ABOUT OUR PRODUCTS

Our team in Tador Technologies is composed of dedicated and hardworking people to ensure that the products are of highest quality. We use the highest quality of materials to ensure durability and edginess in design of our every item. We also make sure it's well-designed and convenient for each buyer.

Using our R&D team of technicians and engineers we try to make sure that our products will support and stand the highest quality and certificates available in the market.

Do you have a special project or solution in mind? we would like to hear about it and develop it.

SOLUTIONS VILLAS AND OFFICES

Tador Product solutions are developed and manufacture in Israel one of the top leading country's when it comes to security solutions.

FUNCTIONS

All of Tador IP solutions support SIP protocol which allow our panels to communicate with SIP / IP related products such as IP PBX etc

Poe, allows the panel to be connected and work on POE cable without the need to connect to a separate power supply

Using Tador special IP camera which supports Onvif technology, it is possible to integrate the camera to NVR in additional to Video IP call

Tador panels, are made of thick anodized brush aluminium by special CNC machines which give extra durability against vandalism and hard weather conditions

Depending on the model, the pcb supports two door relays which allows you to open two different doors (simultaneously or individually)

Tador Panels support Pcmu, Pcma, and echo stabilizer that gives crystal clear sound

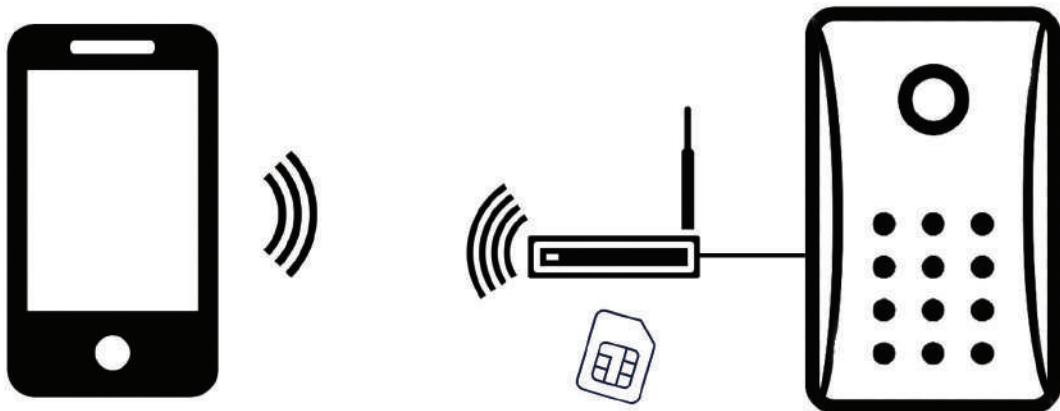

Tador keypad and Buttons are illuminated by anti vandal buttons or keypad with light blue colour

UNDER CONSTRUCTION

Due to the increase in the demand for construction and development of smart cities and buildings, the need has arisen for temporary systems that do not require wiring and can work on the cellular network (3G, 4G).

The result is video and audio which adapts itself to the browsing speed and will give maximum output of quality

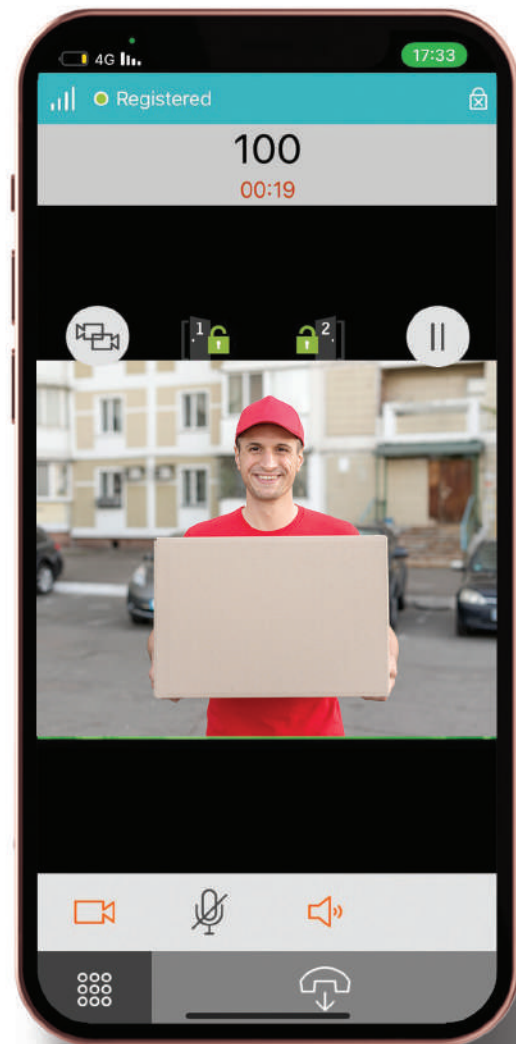

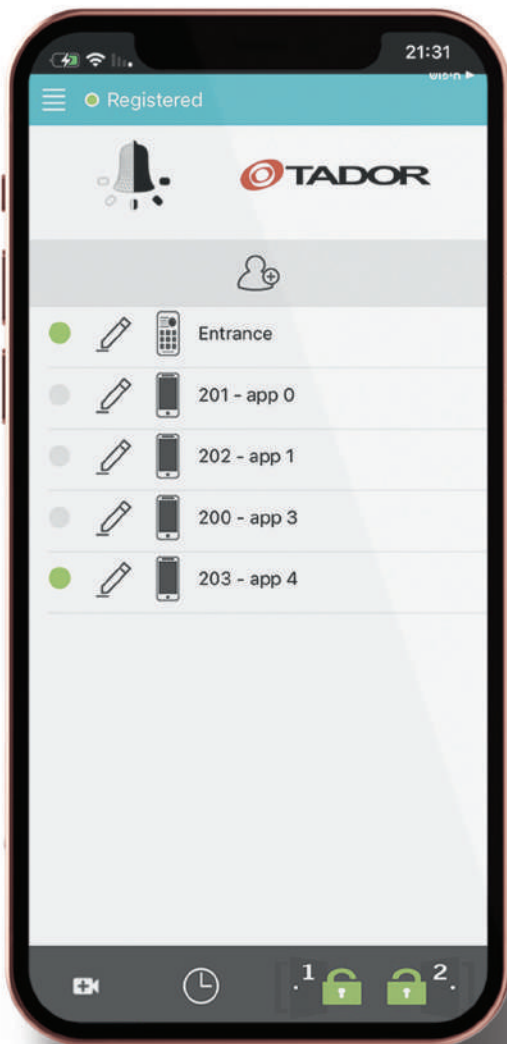

MORE THAN JUST AN INTERCOM

Recieve Notification on your smartphone when the Door intercom calling button is pressed.
You can see your visitors, talk to them and open the door
