VOL. 1

ABOUT US

Tador Technologies LTD established in 1987 is the countrys leading manufacture of access control and security systems.

Tador is dedicated to develop, manufacture and market solutions for door phone, telephone entry systems and access control.

Our products are selling worldwide by distributors, wholesale and authorized solution providers in the field of access control.

We invest substantial resources in R&D to be able to offer customised solutions to the market demands.

CONTENTS

ABOUT OUR PRODUCTS

Our team in Tador Technologies is composed of dedicated and hardworking people to ensure that the products are of highest quality. We use the highest quality of materials to ensure durability and edginess in design of our every item. We also make sure it's well-designed and convenient for each buyer.

Using our R&D team of technisions and engineers we try to make sure that our products will support and stand the highes quality and certificates avilable in the market.
Do you have a special project or solution in mind? we would like to hear about it and develop it.

SOLUTIONS VILLAS AND OFFICES

Tador Product solutions are developed and manufacture in Israel one of the top leading country's when it comes to security solutions.

FUNCTIONS

SIP — All of Tador IP solutions support SIP protocol which allow our panels to communicate with SIP / IP related products such as IP PBX etc

PoE — Poe, allows the panel to be connected and work on POE cable without the need to connect to a separate power supply

HD — Using Tador special IP camera wihch supports Onfiv technology, it is possible to integrate the camera to NVR in additional to Video IP call

Anti Vandal — Tador panels, are made of thick anodized brush aluminium by special CNC machines which give extra durability against vandalism and hard weather conditions

2 / 1 relays — Depending on the model, the pcb supports two door relays which allows you to open two different doors (simultaneously or individually)

**HD** — Tador Panels support Pcmu, Pcma, and echo stabilizer that gives crystal clear sound

Tador keypad and Buttons are illuminated by anti vandal buttons or keypad with light blue colour

UNDER
CONSTRUCTION

D ue to the increase in the demand for construction and development of smart cities and buildings, the need has arisen for temporary systems that do not require wiring and can work on the cellular network (3G, 4G).
The result is video and audio which adapts itself to the browsing speed and will give maximum output of quality
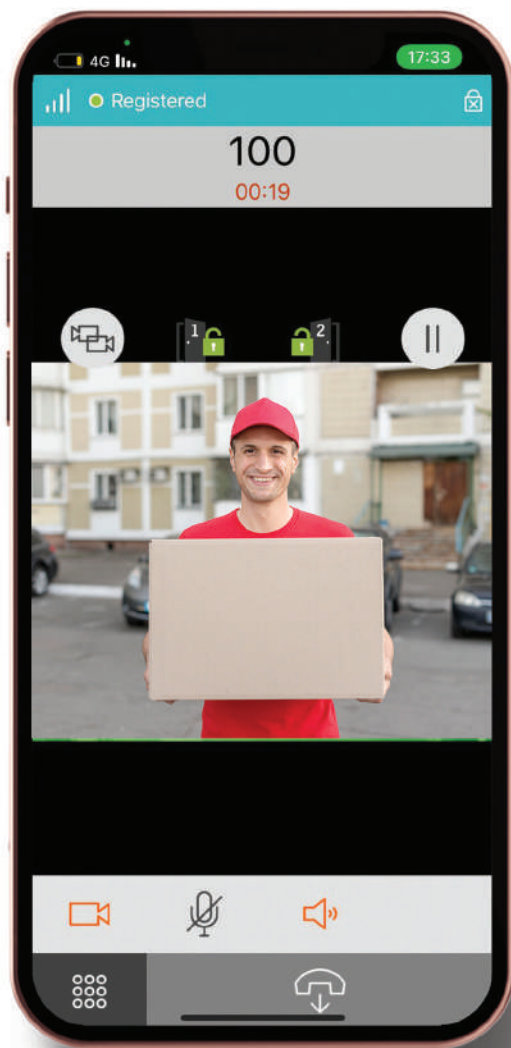

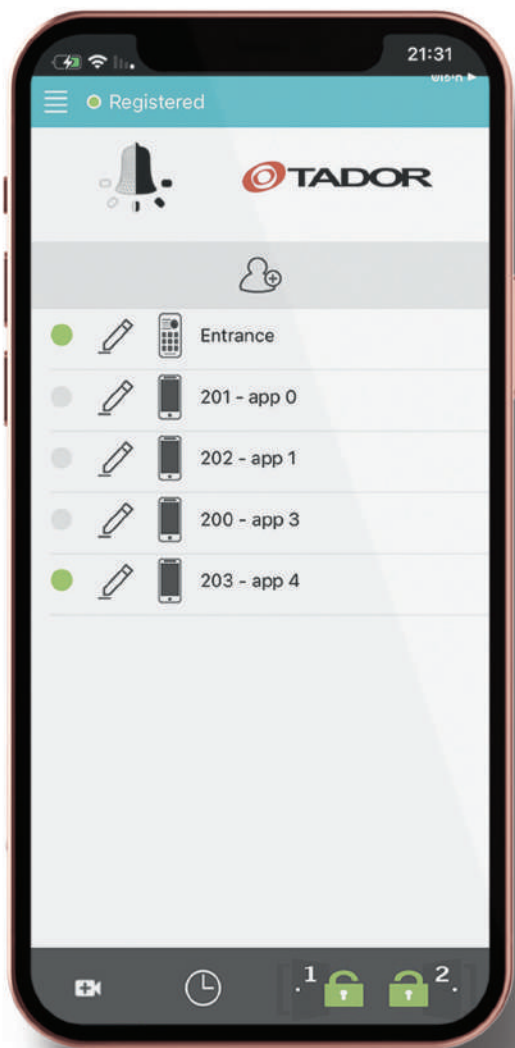

MORE THAN JUST AN INTERCOM

Receive Notification on your smartphone when the Door intercom calling button is pressed.
